

INTENSE ESPRESSO CAPSULE¹ HOME COMPOSTABLE

Innovative **Torrié Home Compostable** capsules reflect commitment to environmental sustainability and are a conscious choice for lovers of Portuguese roasting coffee. Produced exclusively using **100% organic plant materials** such as vegetable oils, cellulose and coffee, they are therefore formulated only based on plants and so are free of fossil fuel derivatives. Accordingly, they are easily, naturally and biologically broken down, through home composting. Once used, Torrié Home Compostable capsules may be placed in a plant pot, garden, home composter or simply placed in an organic waste bin, where they will decompose naturally, no special facility required. This natural decomposition process contributes towards the production of nutrients, themselves natural, enriching the soil and boosting its quality, also significantly reducing waste. Thus, they are capsules which contribute towards a healthier, more sustainable environment, certified by *TÜV Austria*, an internationally-recognised certifying body, officially as BIOBASED and HOME COMPOSTABLE capsules.
