VINIFICATION PROCESS / MATURATION

Production by the estate's grapevines has decreased over time, resulting in more balanced grapes and highly concentrated wines of unique elegance. The full potential of Quinta da Soalheira's vineyards is achieved by producing this unoaked wine without aging in barrels, thereby accentuating the grape's intense and fresh aromas.

After total destemming, the grapes are lightly crushed. Brief pre-fermentation maceration is followed by pomace fermentation for 6-8 days at a controlled temperature of 28 °C with fairly frequent pumping up. After alcoholic fermentation, the wine is separated from the solids with which it fermented. The wine ages in stainless steel tanks, performing micro-oxygenation to enhance its aromatic profile.

BOTTLING

Carried out in inert atmosphere with total deoxygenating of bottles.
